This action is responsive to the communication filed 2/12/2004.

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by JP '720 (JP 7-28720). JP '720 shows a fluid control apparatus including MFC 53, on-off devices comprising two port valves 56, 55 and valve mounts 10/24 and 11/25.

Applicant's remarks have been fully considered but are not deemed persuasive. In the embodiment of a single two port valve on either side of a MFC, the only ports that will or need to be held in communication are the valve port adjacent the MFC and the MFC port, which is what is shown in JP '720. The ports join at the upper side of the mounts and the lower side of the components. It is noted that the instant valve mounts are composites of plural elements.

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
